

The Ballarat Turf Club recently installed the new ECA Rebound Safety Crossing which has been a complete game changer for our Club.

It has lowered the time I spend preparing a crossover for race day and better still there s no clean up afterwards.

We have had many Jockeys comment on how well the horses have travelled and how safe they felt over the crossing.

To my amazement we recently renovated one of our in-field tracks where we installed approx. 15,000 tonnes of sand. The crossing withstood all trucks with minimal impact.

As the Ballarat Turf Club have made the right decisions by installing the ECA Round Crossover.

And most importantly the feedback that we have received from trainers, jockeys and vets has been nothing but positive.
